

Turaco Security System

Provide your customers protection & peace of mind

Now more than ever, your end customers are concerned about security. They're seeking better ways to protect their homes and businesses, and to prevent security breaches from happening.

Magalcom has developed an exclusive solution to effectively safeguard assets, property and peace of mind. The **Turaco Security System** provides service providers with the unique opportunity to enter the growing and

profitable market of security services. Increase your monthly revenues and retain customers longer while giving them protection against malicious damage or theft.

Our **fully managed, IP-based, cloud platform** enables you, the service provider, to quickly, and extremely affordably, add security services to your portfolio. Help your customers in securing their assets, homes or buildings.

Benefits for service providers:

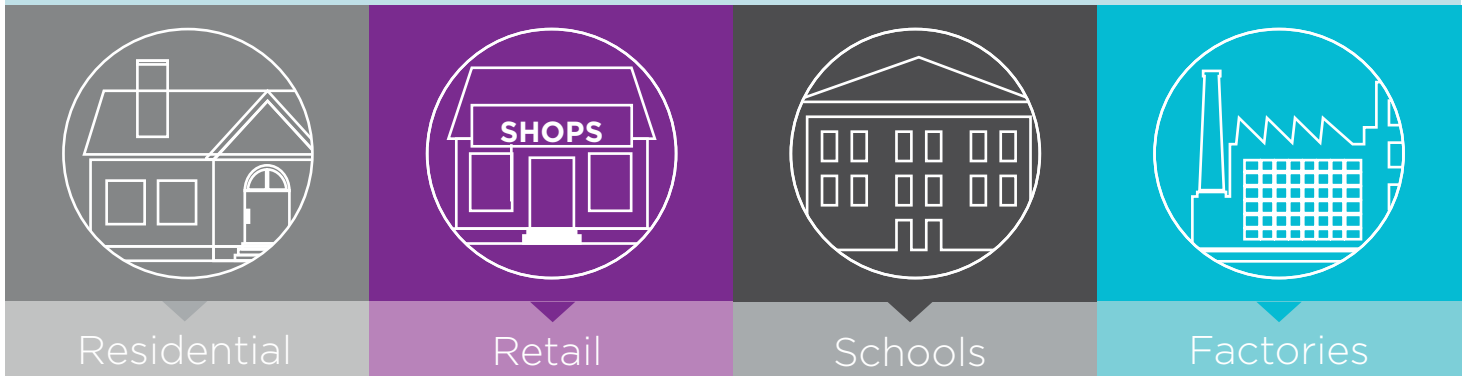

- Increase average revenue per user (ARPU)
- No need for CAPEX/capital investment
- Improve customer retention, reduce churn
- Enhance image as an innovative provider
- Provide a platform for future growth, (telemedicine, home automation & more)
- Leverage existing customer network assets

Turaco offers a comprehensive line of products designed to meet your customers' unique needs:

- Passive Infrared (PIR) Sensors
- Magnet Sensors
- IP Surveillance Cameras
- Panic Buttons
- LCD IP-Based Security Panel
- Safety Sensors
- Telemedicine Bracelets
- And more...

Value Added Services to increase your revenues & customer retention.
